

Murrin Project

Client:

Anaconda Nickel

Location:

Leonora, Western Australia

AMECO Project Value:

AU\$5,000,000

Project Value:

AU\$1 Billion

Project Duration:

12 Months

Peak Workforce:

2,350

Total Craft Hours:

4,000,000

Major Pieces of Equipment:

220

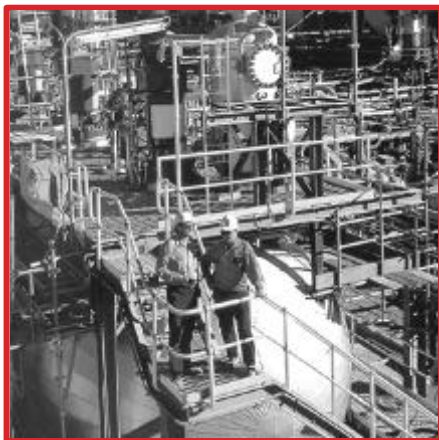

This was the largest fast track metallurgical project in the world with 85 percent of all construction being completed in eight months.

The processing plant alone contains over 23,000 pipe spools, 3,400 tons of structural steel and 35,000 cubic metres of concrete.

The plant when complete will produce 45,000 tonnes of nickel per annum.

AMECO supplied and serviced onsite crange from 14 tonnes to 150 tonnes, catering for all servicing requirements with onsite service facilities including:

- ◆ Supply and maintenance of handtools
- ◆ Hydrotest equipment
- ◆ Mobilisation and demobilisation of all construction equipment
- ◆ Fleet maintenance of onsite vehicles
- ◆ Supply and maintenance of craft transport fleet
- ◆ Supply and control of certified welding consumables
- ◆ Logistics support around site
- ◆ Supply of safety equipment through stores

Delivering integrated equipment and tool solutions to industry
