

# GLOBAL MINING SERVICES

Safety, performance, and responsiveness for mining operations everywhere

Mining project teams are under pressure now more than ever to save time and money while improving safety and the bottom line. It is all possible, with one call to AMECO. We provide custom solutions that reduce the duplicated efforts common with multiple contractors on a site, allowing clients to optimize their resources, lower their costs, and execute projects more efficiently. Clients can rely on a single point of contact for all equipment, operators, support services, and maintenance requirements needed to execute on a mine site.

# Providing solutions to the mining industry for over 20 years

## WHAT WE DO FOR YOU

### Our top priority – A safety-first culture

We adapt our corporate health, safety, and environment plan to the conditions and requirements of each client and mining project. To establish all potential risks and mitigation strategies, AMECO starts with a thorough risk matrix for all areas of the service.

### Performance-driven and efficient in every condition

We drive performance, whether a project is focused on volume and productivity or on cost savings. AMECO is focused on equipment availability and quick turnarounds. We know mining, and we help you meet all the metrics that matter for you.

### Responsiveness and adaptability for changing needs

The nature of the mining business means projects change along with the markets. Site managers know the longer you wait to adapt to these changes, the more costs rise and deplete potential profits. Our robust project planning and forecasting processes support changing needs across the life of the project, so we are proactive and responsive to changing needs from Day 1 through Year 30.

### Support for mining communities worldwide

Decades of stellar customer support around the world mean we have experience working in even the most remote communities. We bring vital services to towns wherever we go, including jobs and job training for members of local communities.

## SPECIALIZED MINING SUPPORT SERVICES

### Customer testimonial – AMECO gets results

We know the costs of changing suppliers and operators can be high. For a mine in Chile, it was a worthwhile change. In 1996, AMECO began providing light vehicles to personnel during the construction phase of the mine. Once construction ended, the site managers invited us to take over support for the equipment fleet. Over the years since, AMECO has been serving the mine with:

- ▶ Fleet services
- ▶ Construction Site Services<sup>SM</sup>
- ▶ Equipment inspection and management
- ▶ Warehousing
- ▶ Material and pebble movement
- ▶ Lifting services

AMECO has been providing excellent service for 20 years.

### About AMECO

AMECO is a global leader in integrated mobile equipment and tool solutions. We provide a wide range of services to the construction, mining, government, and industrial markets around the world. When we give our word, we keep it. We accomplish this by bringing top-tier people, practices, and assets together to reduce your total costs and provide you with the best customer experience possible.
